EFPT

Shaping the future of psychiatry

Follow us: efpt.eu

The European Federation of psychiatric trainees (EFPT) is an independent federation of psychiatric trainees associations. It represents the consensus of psychiatric trainees organizations across European countries and advocates for what training should look like, regardless of the country.

Presentation

The psychotherapy study run from 2013 to 2015 to understand the actual opportunities and wishes for training in psychotherapy in Europe among psychiatrist trainees in 19 countries.

Presentations of the survey

Past

- “The EFPT Psychotherapy working Group and its Survey on Psychotherapy Training 2013-2015” was presented at the [Royal College of Psychiatrists](#) - faculty of Psychotherapy Annual Meeting 22-24 April 2015 by Alina Petricean (UK, Romania)
- “The EFPT Psychotherapy working group” was presented at the “Portuguese Psychiatric National Congress in 2013 by Rita Silva (Portugal)

Projects

- Accepted talk : “Should all psychiatrists be skilled to practice psychotherapy ? Thomas GARGOT (France) and Ekin Sonmez (Turkey), [European Psychiatric Association Congress](#), March 12th - March 15th 2016
- Submission Project : “How psychiatrist trainees are trained in Psychotherapies in Europe ? A European trainee survey”, Thomas GARGOT (France), [European Association of Behavioural and Cognitive Therapies conference \(EABCT\)](#), August 31st - September 3rd 2016, deadline 17th march
- Submission Project : How psychiatrist trainees are trained in Psychotherapies in Europe ? A European trainee survey" in Italian, Diego Quattrone (Italy) [Italian Federation of Psychotherapy Associations \(FIAP\)](#)

To do list

It can be found [here](#).

Actual recommendations

EFPT Psychotherapy Working Group statement

“A working knowledge of psychotherapy is an integral part of being a psychiatrist and this must be reflected in training in psychiatry. All trainees must gain the knowledge, skills and attitudes to be competent in psychotherapy. Competence should be gained in at least one recognised form of psychotherapy (of the trainees choice) and basic knowledge should be gained in the other forms of psychotherapy to allow the trainee to evaluate suitability for referral to specialist psychotherapist. Training in psychotherapy must include supervision by qualified therapists. A personal psychotherapeutic experience is seen as a valuable component of training. It is crucial that trainees have access to relevant psychotherapy experience to cater to the needs of the appropriate patient group that the trainee is dealing with or is expected to deal with in the future.

Relevant training authorities should ensure that time, resources and funding are available to all trainees to meet the above mentioned psychotherapy training needs.”

Discussed and voted by EFPT delegates in Lisbon 1996, Tampere 1999, Napoli 2001, Sinaia 2002, Paris 2003, Istanbul 2005, Gothenburg 2008, Cambridge 2009 and Zurich 2013

Participants of the study

Gender

Gender of participants in Europe reponses

Age

Age distribution

Year in Training

Are you receiving personal psychotherapy or have you received it in the past?

Receiving personal psychotherapy (present or past)

I am undertaking training in Psychotherapy within my training programme in Psychiatry

I am undertaking training in Psychotherapy on my own initiative

Training in psychotherapy outside my training programme

I am not undertaking any training in Psychotherapy

I am not undertaking any training in Psychotherapy

Psychotherapy training taking place within working hours is recommended by UEMS as a mandatory component of curriculum.

I have completed full training in a Psychotherapy specialty in the past

Completed a full training in a Psychotherapy (past)

I am training in some modality

I am training in some modality of psychotherapy

Is psychotherapy important for your identity as a psychiatrist ?

Psychotherapy important for the professional identity

Do you want to practise Psychotherapy ?

Plan to practise Psychotherapy after training

Are you interested in this psychotherapy?

“The following experience in Psychotherapy is a mandatory part of my training in Psychiatry:”

UEMS Charter on Psychiatry states that minimum duration of theoretical psychotherapy training should be 120 hours during 5 years. It also states that as a minimum, psychodynamic, CBT and systemic theory should be taught.

The following experience in Psychotherapy is a mandatory part of my training in Psychiatry

Are you qualified to practice Psychotherapy after your training ?

What types of psychotherapy modalities are available for treatment of patients at your institution?

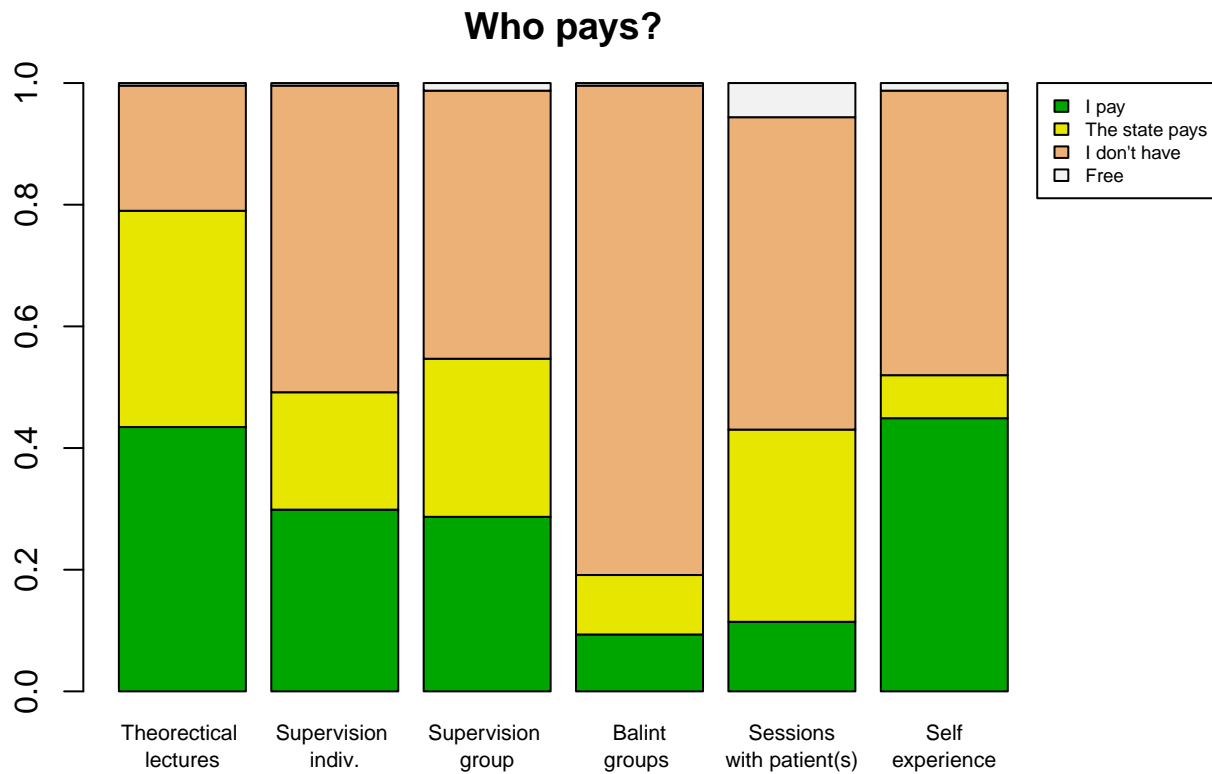

How many hours of supervision

UEMS Charter on Psychiatry states that minimum duration of psychotherapy supervision should be 100 hours during the whole training of 5 recommended years. It makes 1.7 hours approximatively a month.

```
table(data_Europe$q_0015)
```

Who pays?

Would you train for free?

Motivated to train in Psychotherapy for free?

UEMS recommendations states that psychotherapy training of trainees should be funded publicly and free for trainees.

How much would you invest in psychotherapy training ?

% of annual salary for psychiatry training

Satisfaction group

Response Strongly Disagree Disagree Neutral Agree Strongly Agree

Awareness of UEMS recommendations

Response No Uncertain Yes
