# Demographics plots

Roberts Klotins and Thomas Gargot

6th March 2016

This piece of markdown explores how to do markdown reports using `ggplot` graphs, displaying textual data in tables using `kable`, and naming rmarkdown chunks so that they can be referred to from other chunks.

Demographics of our study population in Czech Republic

We had 27 of responses from Czech Republic

Sex	Number
Female	16
Male	10

This is the first go at ggplot graphics and we can see it work in HTML and PDF.
